

CONTENTS

SECTION 1. Preparing future specialists in the topographic, geodetic and land management fields for professional activity in the context of modern challenges (Bavrovska N. M., Movchan T. V., Komarova N. V.)	1
1. Emergence of the prerequisites of the problem and formulation of the problem.....	1
2. Analysis of existing methods for solving the problem and formulating the task for optimal development of technology.....	3
SECTION 2. Formation of a competitive vocational teacher: the experience of the National Transport University (Bakhtiarova K. S., Kharchenko A. M.)	15
1. The problem of forming the competitiveness of future teachers of vocational training.....	16
2. Experience of the National Transport University in training future teachers of vocational education and training	18
3. Promising research directions on the issue of competitiveness of the future teacher of vocational training	26
SECTION 3. Conceptual aspects of professional training of future specialists in physical rehabilitation for the formation of a health-preserving educational environment (Bielkova T. O.).....	32
1. The concept of professional training of future specialists in physical rehabilitation for the formation of a health-preserving educational environment.....	33
2. Formation of a health-preserving educational environment as an aspect of the activities of a future specialist in physical rehabilitation at a university	41
SECTION 4. The author’s comprehensive contextual methodic for the leadership competence formation of future officers – specialists in physical culture and sports in the professional and pedagogical training process (Biloshytskyi V. V., Lyman R. M.)	53
1. The essence and content of the concept of “Author’s comprehensive contextual methodic for the leadership competence formation of future officers in the process of professional and pedagogical training” and the basic principles of this methodic implementation.....	55

2. Methodic stages for the leadership competence formation of future officers in the process of professional and pedagogical training	59
---	----

SECTION 5. Features of the Development of Professional Orientation of Students in the Process of Specialized Training (Vasylykevych Ya. Z., Ryk H. S., Kikinezhdzi O. M.).....	69
1. Theoretical Analysis of the Problem	71
2. Features of the development of students' career orientations.....	76
3. Types of Professional Orientation of Future Specialists' Personalities	80

SECTION 6. Interdisciplinary education in medical universities: integration of therapeutic knowledge into the educational process (Vivsiannyk V. V., Alieksieieva I. I.).....	88
1. The role of therapeutic disciplines in the formation of interdisciplinary education	90
2. Problems of rhetoric in the modern world	93
3. Practical aspects and prospects for the implementation of an interdisciplinary model of education.....	95

SECTION 7. Acmeological approach in the formation of rhetorical competence of students of higher education (Hordiienko O. A.)	102
1. Formation of a student's rhetorical competence is one of the defining tasks of a higher education institution. Language and speech as a scientific problem	103
2. Problems of rhetoric in the modern world	111
3. Knowledge of phraseology and its correct use as a component of rhetorical competence	118

SECTION 8. Preparation of future mathematics teachers for professional activity in the conditions of forced distance learning (Hryhorieva V. B., Kotova O. V.)	129
1. KSU-online distance learning platform, purpose and possibilities of using it for training future mathematics teachers.....	130
2. Organisation of distance learning for future mathematics teachers	133

SECTION 9. Project-Based Learning in Vocational Education Institutions as a Key to Developing Intellectual Capital (Humennyi O. D.)	141
1. Innovative Technologies in Project-Based Learning as a Tool for Developing Intellectual Capital	143
2. Modern Challenges and the Development of Intellectual Capital in Vocational Education	147
3. Integration of Information and Communication Technologies in Project-Based Learning for the Development of Intellectual Capital	153
SECTION 10. Aspects of engineering disciplines teaching on the example of implementing the results of scientific research into the educational process to improve the efficiency of technology and quality of strengthening gas-flame coatings (Deryabkina E. S.)	160
1. Emergence of the prerequisites of a scientific problem and formulation of the problem.....	161
2. Analysis of existing methods for solving the scientific problem.....	163
3. Improving the quality of restored vehicle parts by applying coatings by integrated gas-flame spraying.....	168
SECTION 11. Analysis of the current state of the national education and science system in Ukraine (Dorohyi Ia., Doroha-Ivaniuk O., Berdychenko I.)	190
1. Analysis of the State of the National Education and Science System in Ukraine	195
1.1. General Characteristics of the National Education and Science System of Ukraine.....	195
1.2. Analysis of the Current State of Secondary Education.....	196
1.3. Analysis of the Current State of Higher Education in Ukraine	199
1.4. Analysis of the Current State of Science and Innovation in Ukraine	203
2. Recommendations for Improving the National Education and Science System	206
2.1. Improvement of State Policy in the Field of Secondary Education	206
2.2. Improvement of State Policy in the Field of Higher Education	208
2.3. Improvement of State Policy in the Field of Science and Innovation...	210

SECTION 12. Implementation of European experience in training students of agricultural specialties in the context of strengthening national food security (Dotsenko N. A., Kurepin V. M., Gorbenko O. A.)	218
1. The current state of development of the professional training system for students of agricultural specialties in the context of strengthening national food security in EU countries	219
2. Implementation of the European experience of training students of agricultural specialties in the context of strengthening national food security	230
SECTION 13. Methodology of fitboxing classes for senior school age pupils in the conditions of circle work of general secondary education institutions (Dubynska O. Ya.)	240
1. The current state of physical education in general secondary education institutions of Ukraine.....	242
2. Practical experience of using fitness equipment in physical education of high school students	247
3. Content and structure of fitboxing training methods in the conditions of circle work for senior school age boys	253
4. Dynamics of changes in indicators of physical fitness and functional state of boys of senior school age under influence of fitboxing.....	261
SECTION 14. The future of students' self-education in the era of artificial intelligence (Zhukevych I. P.).....	269
1. Virtual Environments and AI in Students' Self-Education	270
2. Strategy of AI Implementation in Students' Self-Education.....	274
SECTION 15. Introduction of the scientific research results on structure formation in heterogeneous alloys into the "Materials Science and Technology of Structural Materials" discipline (Klochko O. Yu.).....	286
1. Emergence of the prerequisites of a scientific problem and formulation of the problem.....	287
2. Analysis of existing methods for solving the scientific problem	288
3. New modeling approaches in determining the heat treatment parameters	291

SECTION 16. The genesis of the professional axiosphere of youth and its formation in the process of professional training (Kovalchuk G. O.)	315
1. Values and value orientations in the determination of public and social processes	315
2. Typical manifestations of character orientation as predictors of axiosphere formation	325
3. Methodological approaches to the formation of a professional axiosphere in vocational training.....	343
 SECTION 17. Self-education of the individual as a component of the holistic process of training specialists in the field of social security (Komarynska Z. M.).....	360
1. Emergence of the prerequisites of the problem and formation of the problem	361
2. Analysis of existing methods of solving problems and formulating tasks in the process of self-education of a future specialist in the field of social security	365
 SECTION 18. Initial judicial training in Ukraine: implementation of EU standards (Kravchuk O. V., Fuley T. I.)	372
1. Development of initial judicial training in Ukraine	373
2. Challenges of initial judicial training at the current stage.....	381
 SECTION 19. Integration of international experience in improving training, teaching and management of the training system for future designers in Ukraine (Krasovska O. O., Kolesnyk N. Ye., Krasovska O. O.).....	395
1. Analysis of modern trends in learning, teaching and management of the higher education system in the countries of the European Union.....	397
2. Strategic visions of higher education institutions in Ukraine of the European Union countries in the field of training future designers ...	399
 SECTION 20. History of formation and peculiarities of regulation of the specialty “Pharmacy, Industrial Pharmacy” under martial law in Ukraine (Krychkovska A. M., Hubytska I. I., Zayarnyuk N. L.)	414
1. History of the emergence and development of the specialty “Pharmacy, Industrial Pharmacy” at the National University “Lviv Polytechnic”	416

2. Regulation of educational activities in the specialty “Pharmacy, Industrial Pharmacy” under martial law in Ukraine	421
---	-----

SECTION 21. The use of lms moodle in educational process: results of a survey of teachers and university students (Krutko T. V.).....	429
1. Analysis of recent studies and publications	431
2. Research methods and results.....	434

SECTION 22. Prospects and challenges of using artificial intelligence in the professional training of students of higher education in the specialty “Medicine” (Kuznetsova M. O., Myroshnychenko M. S., Kuznetsova I. K.)	450
1. Prerequisites for introducing artificial intelligence into the educational process in the institutions of higher medical education	451
2. Analysis of data on the use of modern AI computer technologies in the practical training of future doctors	453
3. Possibilities of using artificial intelligence in the professional activity of a doctor	454

SECTION 23. Formation of technological and professional competences of new generation specialists: simulation of assistant robots in a virtualized educational environment taking into account neuropedagogical methods (Kuznietsov Ye. S.).....	469
1. Overview of the problem of formation of technological and professional competences of specialists of the new generation.....	470
2. Using of robot assistants in the virtualized environment of professional education.....	475
3. Methodological aspects of the integration of assistant robots and VR technologies into professional education: opportunities, challenges and prospects for development.....	485

SECTION 24. The role of academic integrity in forming PhD’s reputation (Kuzmenko A. O.).....	494
1. The main aspects of academic integrity	495
2. Challenges of academic integrity in modern educational environment.....	498
3. The academic integrity value in professional reputation of a future PhD.....	501

SECTION 25. Assessment of psychological perceptions
of young people about employment in wartime conditions
(Kuzmin V. V., Stadnyk A. G., Speranskyi I. O.).....507

1. Description of the methodology and procedure of the youth survey 508
2. Analysis of the survey results: identification of the main trends
in perceptions of employment 513
3. Analysis of socio-demographic and educational factors
of problems affecting the perception of employment 518
4. Analysis of current problems of youth employment
in wartime conditions and ways to solve them 522
5. Proposals regarding the inclusion of psychological support
and counseling for young people regarding employment 525

SECTION 26. Psychological conditions and factors
of soft skills development in employees
(Kuzmina M. O., Chepets O. L.).....534

1. Internal psychological factors of soft skills development
(motivation, self-esteem, emotional intelligence)..... 534
2. External factors: corporate culture and its influence
on the development of soft skills 538
3. The role of education and training in the development
of soft skills 548
4. Research methodology and stages..... 553
5. Selection and organization of the experiment..... 555
6. Description of psychodiagnostic methods and tools
for assessing the level of soft skills development 560
7. Analysis of research results: dynamics
of soft skills development after training 563
8. Recommendations for the company “Global Food Solutions”
on the implementation of soft skills development programs 570
