

# COTENTS

## FLORA AND VEGETATION

### Chapter 1

**Features of the condition and reproduction of the main Forest-forming species and nut-bearing species in the forest-steppe conditions (Neyko I. S., Matusyak M. V., Neyko O. V.) . . . . . 2**

1. Characteristics of the condition and reproduction of common oak in clonal plantations . . . . . 3
2. Current condition and reproduction level of the Douglas fir family plantation . . . . . 10
3. Features of the reproduction of Ukrainian-bred hazelnut varieties . . . . . 17

### Chapter 2

**Current state of the phytocenosis of the Runa Meadow of the Carpathians (Feketa I. Yu.) . . . . . 27**

1. Phytocenotic diversity of the Runa Meadow . . . . . 29
2. Influence of abiotic environmental factors on the formation of the flora of the Runa Meadow . . . . . 33
3. Current state, problems, and prospects for the use of phytocenoses of the Runa Meadow . . . . . 39

## ECOLOGY

### Chapter 3

**Environmental principles in the development of scientific strategies for the conservation and restoration of natural ecosystems under anthropogenic pressure (Voloshanska S. Ya., Kvasnii L. H., Drozd I. F.) . . . . . 48**

1. Ecological prerequisites for the formation of scientific strategies for the conservation of natural ecosystems . . . . . 49
2. Scientific approaches to ecosystem restoration under anthropogenic pressure . . . . . 51
3. Features of developing scientific strategies for the conservation and restoration of ecosystems in Ukraine . . . . . 53

## Chapter 4

### **Bacteria from environments with extreme conditions as biological agents for the development of preparations for plant growth promotion (Hnatush S. O., Komplikevych S. Ya., Maslovska O. D.) . . . . . 60**

1. Characteristics of the bacteria used in the study . . . . . 62
2. The effect of bacteria resistant to environmental factors on the growth of wheat seedlings . . . . . 65
3. The effect of compositions of resistant to environmental factors strains of bacteria on the morphological and physiological parameters of wheat seedlings . . . . . 72

## Chapter 5

### **Monitoring and assessment of atmospheric air quality: sources of pollution and impact on ecosystems (Dunaievskia O. F., Sokulskiy I. M., Hutty B. V.) . . . . . 86**

1. The condition of the air basin as an indicator of environmental quality . . 91
2. Sources of atmospheric pollution and their environmental consequences . . . . . 101

## Chapter 6

### **Ecological-coenotic differentiation of syntaxa of the class Carpino-Fagetea sylvaticae of the Left-Bank Forest-Steppe of Ukraine according to phytoindication parameters (Kalinskyi P. V., Goncharenko I. V., Drebot O. I.) . . . . . 119**

1. Materials and methods of research . . . . . 121
2. Results and their discussion . . . . . 125

## Chapter 7

### **Ecological aspects of territorial community management in the system of preservation and restoration of natural ecosystems (Kvasnii Z. V., Senkiv V. M., Danylenko Yu. V.) . . . . . 138**

1. The role of ecological principles in the formation of natural resource management strategies of territorial communities . . . . . 139
2. Mechanisms for integrating environmental strategies into the management system of territorial communities . . . . . 142
3. Environmental priorities of the management of territorial communities of Ukraine in conditions of war and post-war recovery . . . . . 144

## Chapter 8

### **Natural ecosystems: fighting hunger, energy and raw materials deficits in the modern world (Kichura D. B., Sobechko I. B.) . . . . . 153**

1. Edible microbes . . . . . 154

2. “Homemade liver” from microbes . . . . .	155
3. Plants that fertilize themselves . . . . .	157
4. New plants from a test tube . . . . .	159
5. Microbes against pests . . . . .	161
6. “Frost-resistant” bacteria . . . . .	162
7. Clean water thanks to the work of microbes . . . . .	163
8. Biosensors: Microbes signal pollution . . . . .	165
9. Renewable energy sources . . . . .	166
10. Bioethanol Project in Ukraine . . . . .	167
11. Biogas will save tropical forests . . . . .	173
12. Silent mining . . . . .	174

## Chapter 9

<b>Smart Agriculture: Prospects and Challenges of Using Compact Hydroponic Modules (Kovalov M. M.) . . . . .</b>	<b>180</b>
1. Genesis and Evolution of Compact Hydroponic Systems . . . . .	182
2. Technological Component: Integration of IoT and Artificial Intelligence . . . . .	187
3. Ecological and Economic Potential of Compact Farming . . . . .	193

## Chapter 10

<b>Ecological spatial assessment of the territory as a basis for strategic spatial planning of the development of territorial communities in Ukraine (based on the example of the project “Alley 12.7 km”) (Smirnova M. P.) . . . . .</b>	<b>208</b>
1. Relevance of the topic . . . . .	209
2. State of research and gaps in the field . . . . .	210
3. Methodology, research methods, and description of the process “Alley 12.7 km” . . . . .	215
4. Results of the project “Alley 12.7 km” . . . . .	219
5. Discussion . . . . .	229

## Chapter 11

<b>Environmental aspects of modern pharmaceutical biotechnology: sustainable waste management and phytomanagement of territories (Fedoryshyn O. M.) . . . . .</b>	<b>235</b>
1. The eco-oriented paradigm of the pharmaceutical sector: from EU regulatory requirements to risk assessment . . . . .	236
2. Innovative technologies for bioremediation and purification of industrial flows from pharmaceutical companies . . . . .	240
3. Circular biotechnology: development of biodegradable polymer materials and drug delivery systems . . . . .	243

## Chapter 12

<b>Protection and restoration of Ukraine's natural ecosystems in the context of international commitments and European integration (Fesyuk V. O., Moroz I. A., Polianskyi S. V.)</b> . . . . .	<b>248</b>
1. Ukraine's international obligations in the field of protection and restoration of natural ecosystems. . . . .	249
2. Theoretical and methodological foundations of ecosystem restoration in the context of nature conservation activities. . . . .	252
3. Specific problems in implementing nature restoration measures in Ukraine. . . . .	261

## **BIOLOGICAL RESEARCH**

### Chapter 13

<b>Comprehensive approaches to the prevention of oxidative stress and immunodeficient conditions in animals under technogenic load (Vus U. M., Hutty B. V.)</b> . . . . .	<b>270</b>
1. Use of L-carnitine as a metabolic corrector in animal husbandry. . . . .	271
2. The role of vitamins E and B <sub>12</sub> in maintaining metabolic balance and immune status of animals. . . . .	275
3. Biological role of selenium, zinc, and methionine in maintaining antioxidant status and metabolic balance of the animal organism . . . . .	279

### Chapter 14

<b>Theoretical and Experimental Substantiation of the Development of Hydrogel Systems with Polyphenols (Duk N. M.)</b> . . . . .	<b>294</b>
1. Analysis of Current Trends in the Development of Bioactive Hydrogels. . . . .	296
2. Natural Polyphenolic Compounds: Classification, Properties, Biological Activity, and Methods of Isolation . . . . .	298
3. Mechanisms of Antiseptic, Antioxidant, and Anti-Inflammatory Action of Polyphenols. . . . .	299
4. Prospects for the Use of Polyphenols in Hydrogel Systems for Biomedical and Dermatological Applications. . . . .	300

### Chapter 15

<b>Genetically modified organisms in food impact on the ecosystem (Kichura D. B., Sobechko I. B.)</b> . . . . .	<b>306</b>
1. Why do we use GMOs? . . . . .	308
2. The GMO problem and risks . . . . .	312
3. GMOs as medicines . . . . .	314

4. GMOs – harm or benefit? .....	316
5. Distribution of genetically modified soybean in Ukraine .....	318
6. Genetically modified rice .....	321
7. Food safety and genetics .....	323

## Chapter 16

### **Regulation of bioethical aspects of scientific research**

#### **(Lavryniuk O. O., Mudrenko V. P.) .....** **331**

1. Evolution of Informed Consent in the Era of Biotechnological Monitoring .....	333
2. Ethical Aspects and Regulatory Mechanisms of Animal Research .....	341
3. Ethical Regulation of Digital Diagnostics and Multi-level Standards Control .....	347

## Chapter 17

### **Functional food products in the Ukrainian public health system: adaptation of European experience and technological aspects of formulation development (Neposhyvailenko N. O., Korniienko I. M.) .....** **355**

1. Theoretical justification for the use of functional food products in the adolescent health preservation system .....	357
2. Research concept .....	370
3. Experimental evaluation of functional properties and health-improving potential of food products newly introduced into the daily adolescent diet .....	373

## Chapter 18

### **Biologically active compounds of *Curcuma longa* L. and aspects of their application (Sachuk A. T., Konechna R. T.) .....** **389**

1. Characteristics of <i>Curcuma Longa</i> . L. ....	390
2. Characteristics of curcumin .....	395

## **PHYSICAL AND GEOGRAPHICAL RESEARCH**

## Chapter 19

### **Long-term temperature change in Ukraine (1900–2021): trends, variability and scenarios (Boychenko S. H., Maidanovych N. M.) ..** **412**

1. Long-time changes of average annual surface air temperature on the territory of Ukraine for the period from 1900 to 2021. ....	416
2. The annual cycle of surface air temperature on the territory of Ukraine .....	420
3. Scenarios of warming in Ukraine .....	425

## Chapter 20

### **Hydroecological state and functioning of the Shchyrets Reservoir under anthropogenic load (Ivanov Ye. A., Pylypovych O. V.,**

<b>Bilanyuk V. I.)</b> . . . . .	<b>433</b>
1. Geographic location . . . . .	434
2. Reservoir characteristics . . . . .	434
3. Hydrological conditions of the Shchyryka River basin . . . . .	436
4. Hydrochemical and sanitary-hygienic condition of the reservoir . . . . .	445
5. Population load and water use . . . . .	450
6. Land use structure in the reservoir basin . . . . .	454

## Chapter 21

### **Theoretical, methodological and applied aspects of the study of lake sedimentation in the conditions of Polissya, Ukraine**

<b>(Ilyina O. V., Ilyin L. V.)</b> . . . . .	<b>463</b>
1. Theoretical aspects of the study of lake sedimentation . . . . .	464
2. Mineral component of bottom sediments . . . . .	468
3. Biogenic elements of bottom sediments . . . . .	474
4. Distribution and typification of limnogeochemical sedimentary complexes and the possibilities of their economic use . . . . .	478

## Chapter 22

### **Modern Trends in the Development of River Systems of the Peredkarpattia under Climate Change and Anthropogenic**

<b>Pressure (Palanychko O. V.)</b> . . . . .	<b>487</b>
1. Study Area and Physical-Geographical Preconditions for the Formation of River Systems within the Peredkarpattia . . . . .	490
2. Current Climate Trends and the Hydrological Regime of River Systems within the Peredkarpattia . . . . .	495
3. Anthropogenic Pressure on River Systems within the Study Area . . . . .	497
4. Geoecological Consequences of Contemporary Climate Change and Anthropogenic Pressure on River Systems of the Peredkarpattia . . . . .	500
