

CONTENTS

VETERINARY MEDICINE

Chapter 1

Monitoring the safety of honey during sale and detecting its falsification using express methods (Bohatko A. F.) 2

1. Organoleptic and physicochemical indicators of honey. 4
3. Microbiological indicators of honey produced from different family apiaries. 7
4. Determination of adulteration of sodium honey with sodium bicarbonate and alkaline detergents. 8

Chapter 2

The biological role of selenium in rabbits and its importance in their nutrition (Kovalchuk I. I., Prodanchuk O. V.) 15

1. Bioavailability and metabolism of selenium in the animal organism 17
2. Functional significance of selenium in the formation of the antioxidant response. 23
3. Effects of selenium citrate on the organism of female and male growing rabbits. 25

Chapter 3

Age-related dynamics of total protein and its fractions in the blood serum of Japanese quails (Livoshchenko Ye. M., Pavlovskiy V. V., Livoshchenko O. I.) 48

1. Age-related dynamics of total protein in the blood serum of Japanese quails. 50
2. Age-related dynamics of albumins in the blood serum of Japanese quails. 52
3. Age-related dynamics of globulins in the blood serum of Japanese quails. 54
4. Age-related dynamics of immunoglobulins in the blood serum of Japanese quails. 59

Chapter 4

Effectiveness of SPT® Hemostatic Dressing for critical bleeding in pigs (Markevych O. M., Mysak A. R.) 67

1. Choice of research directions. 71
2. Research materials and methods. 78

3. Comparative analysis of hemostatic efficacy of Celox Rapid and SPT® (AHD) in clinical conditions	84
---------------------------------------------------------------------------------------------------------------	----

TECHNOLOGY OF PRODUCTION AND PROCESSING OF LIVESTOCK PRODUCTS

Chapter 5

Energy-saving technology for keeping Swiss cows (Prudnikov V. G., Kolisnyk O. I., Batyr R. Yu.) 130

1. Features of energy-saving technology for keeping cows, materials and research methods	132
2. Biological and technological features of Swiss breed cows	133
3. Milk production of Swiss breed cows	135
4. Formation of milk productivity of Swiss breed cows during lactation	135

Chapter 6

The effect of lithium addition to compound feed on nutrient metabolism in the goslings' organism (Sobolev O. I., Petryshak R. A., Kosior L. T.) 146

1. The biological role of Lithium and its using in poultry	148
2. Materials and methods	151
3. Results and discussion	153

Chapter 7

Factors influencing milk production and milk quality of mares (Tkachova I. V., Prusova G. L., Liutykh S. V.) 165

1. Efficiency of mares' milk production	167
2. Selection of the object and methods of research	168
3. Factors influencing the milk production of mares	170
4. Factors influencing the quality indicators of mares' milk	178

AQUATIC BIORESOURCES AND AQUACULTURE

Chapter 8

Soluble forms of quercetin in innovative technologies for the preservation of fish products (Falko O. V., Chyzhevskiy V. V., Klochkov V. K.) 194

1. Means and methods for achieving the goal	196
-------------------------------------------------------	-----

2. Results and Analysis	197
3. Searching for explanations for non-trivial (unclear) results	203

BIOTECHNOLOGY AND BIOENGINEERING

Chapter 9

Optimisation of reproductive biotechnologies in goats: the role of cryopreservation (Bogdaniuk A. O., Yurchuk T. O., Petrushko M. P.)	211
1. Methodological and laboratory approaches to goat reproduction using ART	213
2. Biotechnological aspects of goat embryo collection and development: our experience	216

Chapter 10

Biotechnology and bioengineering: Bacterial lectins as components of original medicinal products of biological/biotechnological origin (Welchinska O. V.)	225
1. Biological properties of lectins	227
2. Bacterial lectins as components of original pharmaceutical compositions	234

Chapter 11

Production of postbiotics using the latest non-thermal technologies (Nehoda T. S., Polova Z. M.)	241
1. The benefits of postbiotics	244
2. Factors influencing postbiotic production	249
3. Promising methods for the production of postbiotics	252
4. The potential use of the latest non-thermal technologies in post-biotic production	255
5. Non-thermal treatment methods	267
6. Industrial applications	269
7. Regulatory framework for postbiotics	277

ORGANIZATION OF VETERINARY AND AGRICULTURAL PRODUCTION

Chapter 12

Organization of veterinary and agricultural production

Integrated biosecurity system as a foundation

for the competitiveness of livestock and aquaculture enterprises

(Lavryniuk O. O., Borshchenko V. V., Verbelchuk S. P.) 286

1. Strategic and organizational frameworks for ensuring biosecurity
in animal husbandry 287

2. Digitalization and sector-specific biosecurity features
in integrated agrosystems 293

3. Economic determinants of biosecurity and strategic quality
management tools for agricultural products 300
